We create solutions for the following aspects of migration projects:

- ✓ Software migration & system upgrade
- ✓ Data center migration & farm consolidation
- ✓ Data synchronization
- ✓ Information transformation
- ✓ Performance tuning

Migrate your Virtual Folders into OT CS 2010 Facet Browse

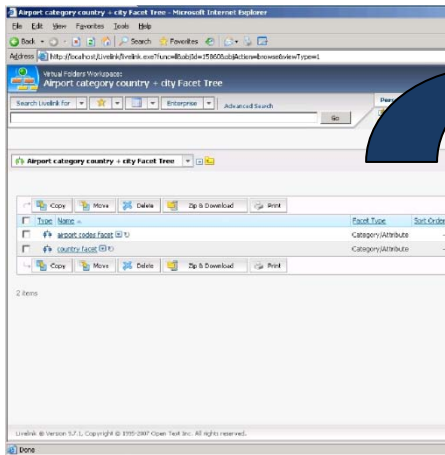

Scope of Services

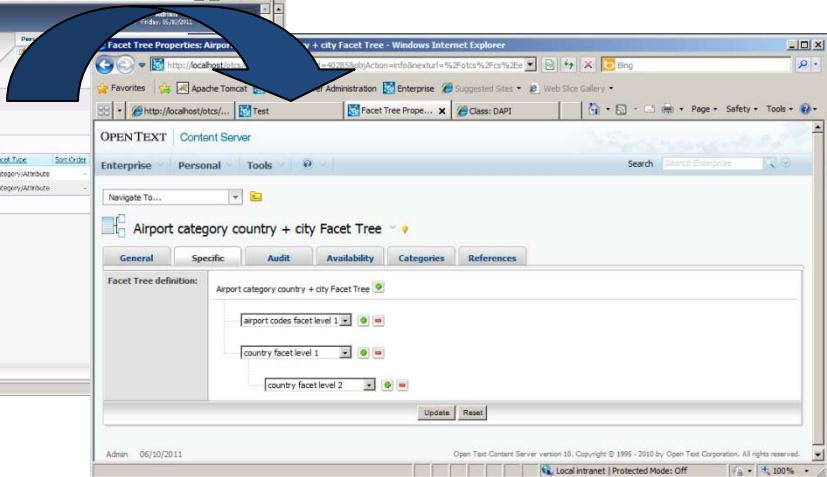

With our product *xml-interLinks* you are able to migrate huge data volumes into Livelink in a quick and easy way. But up to now there was still an important exceptional case:

“Virtual Folders”

For this reason SAW created a new migration service and developed a new migration tool which enables you to migrate Virtual Folders from Livelink 9.7.X into Open Text Content Server 2010.

Virtual Folders in LL 9.7.

Facet Tree in OT CS 2010

Result: With SAW’s migration services and tools you are able to execute an almost (in all but a view small exclusions e.g. categories) complete Livelink migration.
